

# GUIDE DE CASIERS POUR COUPES ET VERRES

2022

**CAMBRO**  
TRUSTED FOR GENERATIONS™

dbmark

Vous trouverez ci-dessous les modèles de verrerie les plus courants en Espagne.

Tout comme les chariots à vaisselle, les paniers de lavage **CAMBRO** sont la meilleure option pour l'entretien de votre verrerie. Leurs caractéristiques exclusives leur permettent de remplir cinq missions importantes :

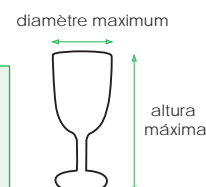

- **Lavage** : très grands espaces intérieurs pour une parfaite circulation de l'eau et du détergent à l'intérieur du panier.
- **Protection** : des prolongateurs et des séparateurs qui protègent toute la hauteur des verres et les empêchent de se heurter les uns aux autres.
- **Transport** : les parois extérieures fermées empêchent la saleté et la poussière de pénétrer pendant la manipulation et le stockage.
- **Rangement** : les paniers à parois fermées sont empilés les uns sur les autres, formant ainsi une armoire parfaite sur laquelle est placé un couvercle. Aucune couverture n'est requise.
- **Triage** : **DBMARK** est la seule société qui vous propose 12 couleurs pour trier et identifier facilement les verres dans chaque panier.

Triez votre verrerie par couleur, en choisissant parmi les 12 couleurs proposées par **DBMARK**.

N'oubliez pas d'ajouter un couvercle et un chariot.
